

Priyanshu Bhatnagar

Java Developer

pbhatnagar631@gmail.com

+91-7354352931

Bengaluru, India

Professional Summary:

Innovative and results-oriented Software Developer with 3.2 years of hands-on experience in designing, developing, and optimizing scalable backend applications. Strong proficiency in Java, Spring Boot, Microservices, Hibernate, and MySQL, with practical expertise in building robust RESTful APIs, implementing secure JWT-based authentication, and enhancing performance through efficient database and application design. Adept in cloud deployment, Docker & Kubernetes orchestration, and CI/CD pipeline automation, with proven ability to deliver high-quality, production-ready solutions in fast-paced Agile environments.

Work Experience:

Software Engineer – Java Developer | iSteer Technologies

May 2023 - Present

Proficient Key Skills:

- **Spring Boot & Microservices:** Hands-on experience in building scalable, high-performance backend applications using **Spring Boot**, **Spring MVC**, **Spring Data JPA**, and **Microservices architecture**.
- **RESTful API Development:** Skilled in designing, developing, and consuming **REST APIs** using **Spring Boot** with a focus on **JSON data** handling, **API versioning**, exception management, and standard **HTTP methods** (GET, POST, PUT, DELETE).
- **Database Management:** Strong knowledge of **MySQL**, **SQL** query optimization, stored procedures, and **ORM frameworks** such as **Hibernate/JPA** for efficient data persistence and mapping.
- **API Integration:** Experienced in integrating third-party APIs including payment gateways, SMS/Email services, and external **REST APIs** for seamless communication.
- **Spring Security & JWT:** Implemented **Spring Security** and **JWT - based authentication** for secure login, authorization, and access control in microservice environments.
- **Redis Caching:** Improved application performance and reduced database load using **Redis caching** strategies.
- **AWS Cloud:** Worked with **AWS** services including **EC2**, **RDS**, **S3**, **ECR**, and **CloudWatch** for deployment, storage, and monitoring.
- **CI/CD Pipelines:** Developed and automated **CI/CD pipelines** using **Jenkins** and **GitHub Actions** to streamline build, test, and deployment processes.
- **Code Optimization & Best Practices:** Focused on clean, maintainable code using **Lombok**, **ModelMapper**, **SOLID principles**, and **design patterns**.
- **Testing & Debugging:** Implemented unit and integration tests using **JUnit** and **Mockito**, ensuring high code quality and stability.
- **API Documentation:** Proficient in generating documentation using **Swagger/OpenAPI** for enhanced team collaboration.
- **Agile Collaboration:** Worked in **Agile/Scrum** environments, contributing to sprint planning, daily stand-ups, code reviews, and creating UML sequence diagrams.

Skills:

- **Languages:** Java, Java 8/17, SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA
- **Architecture:** Microservices, DDD, Event-driven
- **Cloud & DevOps:** AWS (EC2, RDS, S3), Jenkins, GitHub Actions, Docker, Kubernetes
- **Databases:** MySQL, Redis
- **Tools:** Git, GitHub, Postman, Swagger, IntelliJ
- **Messaging:** Kafka
- **Testing:** JUnit, Mockito

Project: _____

LuminaCare - Doctor Appointment Booking Platform

Duration: 3.2 years

Architecture: Microservices | Domain-Driven Design (DDD) | Event-Driven Architecture

Methodology: Agile (Scrum) | Daily Stand-ups | Sprint Planning via JIRA

Tech Stack: _____

Core Java, Java 8, Spring Boot, Spring MVC, Spring Security, JWT, Hibernate, JPA, Feign Client, Stripe SDK, API Gateway, Eureka Server, Zipkin, Spring Boot Admin, Redis, MySQL, Kafka, Twilio, Git, GitHub, Maven, SLF4J, Logback, RESTful APIs, Microservices, Spring Data JPA, Agile, Swagger, IntelliJ IDEA.

Modules & Responsibilities: _____

Patient Service

- Implemented secure patient **authentication, registration, and password** reset functionality using **Spring Security** and **JWT** token-based authentication.
- Configured role-based access control (RBAC) for Admin and Patient roles.
- Managed session persistence and **token validation** to enhance security and patient experience.
- Utilized **SLF4J** and **Logback** for structured logging and application debugging.

Doctor Service

- Developed **CRUD operations** for doctor profiles, including specialties, experience, and availability schedules.
- Integrated **Hibernate/JPA** for **ORM mapping** and optimized database queries for performance.

Appointment Service

- Designed real-time appointment booking modules with **availability validation** and confirmation number generation.
- Implemented dynamic scheduling, rescheduling, and cancellation functionalities.
- Used **Redis caching** for faster access to available slots and doctor schedules.

Booking Service & Notification Service

- Built a booking engine with real-time appointment confirmation.
- Integrated **Kafka** event streaming for notifications to patients and doctors.
- Implemented real-time alerts via **Twilio SMS** and **email APIs** for appointment reminders and updates.

Payment Service

- Integrated Stripe **SDK (sandbox and production)** for secure consultation fee processing and transaction validation.

Search & Filter Service

- Implemented doctor search features by name, specialization, location, and clinic.
- Added filter options for consultation fees, ratings, availability, and online/offline consultation using **Spring Data JPA**.

Infrastructure & Integration:

- Deployed **Spring Cloud API Gateway** for centralized routing, authentication, and rate - limiting.
- Configured **Eureka Server** for service discovery and automatic registration of microservices.
- Implemented **Zipkin distributed tracing** for **performance monitoring and debugging**.
- Integrated **Spring Boot Admin** Server for real-time **health monitoring** and **service metrics**.
- Designed **ER diagrams** and **UML class diagrams** for architecture and database schema review.
- Established **Kafka-based event-driven architecture** for **asynchronous service communication** and **system decoupling**.

Education: _____

B.Tech-Computer Science & Engineering
